Summary

Full-Stack Developer with hands-on experience in TypeScript, React.js, Next.js, Node.js, and PostgreSQL. Skilled in building scalable, high-performance web applications, implementing secure authentication, and integrating AI-powered features using GenAI APIs. Strong focus on modern frontend architecture, backend APIs, and database-driven systems. Actively seeking a Full-Stack or Frontend Developer role to contribute to production-ready, AI-enabled applications.

Skills

Frontend: React.js, Next.js, TypeScript, ShadcnUI, Tailwind CSS

Backend: Nodejs, Prisma

Database: MongoDB, PostgreSQL, Supabase

Headless CMS: Contentful, Sanity

Others: REST APIs, GraphQL APIs, Authentication (OAuth, JWT, NextAuth.js), ORM

Work Experience

Freelance Project: Tee Time Booking

Frontend Developer

- Developed the frontend for a tee time booking platform enabling golfers to schedule play sessions at selected courses.
- Implemented form validation using Zod and managed type safety across components with TypeScript.
- Translated Figma design into responsive, accessible UI using React.js, Next.js, and ShadCN UI.

Frontend Developer — Breakthrough Pulse

Oct 2025 – Present

- Developed and maintained frontend features using React.js, Next.js, TypeScript, Tailwind CSS, and ShadCN UI.
- Integrated REST APIs and implemented responsive UI components to ensure seamless user experience
- Resolved frontend bugs, improved UI flows, and optimized performance across multiple pages and components in a production level project.

Personal Projects

- **E-commerce website:** Developed a fully functional eCommerce website offering a seamless shopping experience from product browsing to secure checkout. The application was built using Next.js and TypeScript, with Tailwind CSS and ShadCN UI for a modern, responsive interface. Sanity was used as a headless CMS to manage product content dynamically, while Stripe handled secure payment integration. Cart functionalities, including item tracking and checkout, were efficiently managed using the use-shopping-cart library.
- **Career Map AI:** Developed an AI-driven platform that generates personalized career roadmaps using Google Gemini API. Built with Next.js 15 (App Router), Supabase (PostgreSQL, Row Level Security, Edge Functions), and OAuth authentication (Google, GitHub). Implemented Server Actions, asynchronous AI streaming, and a responsive UI using Tailwind CSS and Shadcn/UI, ensuring secure data access, scalability, and mobile-first performance.

Education

Virtual University Of Pakistan

B.S in Software Engineering

March 2021 - March 2025

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Web Development
